

Integrated VPN/Firewall

BizGuardian is the ideal integrated VPN firewall solution, tailor-made for small to medium sized businesses. It is a hybrid security solution, combining the strength of hardware and software Firewall and VPN's. BizGuardian Security Appliances are secure, scalable, easy to set up and maintain, providing leading value and low cost of ownership.

BizGuardian VPN Firewalls offer four key Internet security elements in a single convenient package:

Appliance-like ease and low price:

With our exclusive hybrid LoMax Technology®, BizGuardian combines the finest elements of hardware and application security devices. Offering a full spectrum of security, in its default setup, BizGuardian totally locks down your site with full perimeter protection. At the next level, your site security can be tailored to your needs using the included BizGuardian Wizards to help customize your requirements. If full customization is desired, all BizGuardian licenses include powerful rules-based tools that allow you to adapt your VPN Firewall to the desired security features. It's your choice: BizGuardian provides automatic configuration, minimal intervention configuration and maximum flexibility in tailoring your security solution.

Integrated IPsec VPN:

Now you can securely share information with all of your offices and remote/roving employees using the most secure VPN technology. BizGuardian VPN Firewall is written to the IPsec standard, has multiple encryption levels including 3-DES, selectable at the push of a mouse button, and is so easy to setup that you can be using it for branch VPN in ten minutes!

Remote users can also benefit from BizGuardian's integrated

PPTP Server that allows any remote Windows PC to securely connect to your network without any additional expensive VPN client software. Using our LoMax® technology which includes VPN software integrated into our kernel we deliver superb performance. You can easily integrate your customers, suppliers and business partners with BizGuardian VPN.

Full-Featured Firewall: Your organization begins to benefit in minutes from BizGuardian's high performance, reliable Firewall security environment. BizGuardian's LoMax Technology® allows you to immediately establish a consistent security policy throughout your organization. It requires **no vulnerable general purpose operating system**. LoMax®, our hardened kernel, **is** the operating system. Because of its low cost of installation and management, BizGuardian Firewall has one of the lowest costs of ownership in the industry. It is the ideal supplement to enterprise firewalls and VPN's.

Speed, Simplicity, Scalability;

Reliability: Unlike many competitive products, BizGuardian takes minutes to install and deploy – not hours or days. BizGuardian integrated VPN Firewall incorporates powerful management tools to help you modify and manage your security environment as your needs change. You can grow from 1 to 5,000 users without changing your VPN Firewall product. LoMax Technology® is one of the

most reliable, hardened security environments in the industry. It is an ideal security environment to augment enterprise VPN and Firewall products, or where inexpensive "spot" solutions are needed quickly.

- ◆ Optimized to securely share a High Speed, DSL or Cable Internet connection
- ◆ Intrusion Attempt Alerts, Logs, and integrated Intrusion knowledge base.
- ◆ Protect your business/remote offices/roving employees/ businesses partners
- ◆ Detailed logging and reporting for internal and external users
